

**Notes from Cemex Liaison Group
Langley Quarry Stakeholder Liaison Group
Held on 19th August at 4.30pm
Langley Quarry, North Park, Iver**

Proposed Extension Richings Park Golf Club

Application had not been submitted. They will notify the liaison group when the application is submitted, documents to be sent out in the form of a newsletter and FAQ sheet to all residents that were invited to the Public Exhibition, as well as a letter to stakeholders to inform them of the submission. They will be sent around the time the application is submitted. They will keep their website going and there will be links to the documents there and a summary of the proposals.

Cemex advised that:

- Sales are still generally slow and they are working off supplies in the stockyard. They are still on schedule for meeting the existing end dates for extraction and restoration at this point.
- They have had the planning application approved for the installation of some reception facilities for the importation of the inert restoration materials, work has not yet started on installing these.
- The planning application for importing material from Datchet to Langley that is remaining under Datchet plant site was due for a decision that week, however the Planning Officer was on leave so a short time extension has been agreed. There do not seem to be any significant concerns with it in terms of responses from consultees.
